Transitioning to a Post-Carbon Future

Friends of Flagstaff's Future and its members are offering hands-on workshops to teach skills on Moving Toward a "Post-Carbon Future". This workshop series, held in conjunction with the One Community Sustainable Living Lecture Series, offers the community strategies for transitioning to a more sustainable future less dependent on oil. These workshops respond to growing concerns about greenhouse gas emissions and Peak Oil issues (increased demands on oil with diminishing supplies). In this workshop, expert gardener Jim Mast will share his secrets to successful high-altitude gardening — a great way to sustainably produce your own healthy, local foods in Flagstaff!

Refreshments will be served.

Please RSVP to reserve your seat at this event, free of charge.
